Welcome

Dear Students,

Welcome to the second year medicine. As you have already started in the Faculty curriculum (System- Based Curriculum), this year you are in Phase II of the program.

Phase I : Premedical Year (First Year)

Phase II : Second and Third Years

Phase III : Fourth, Fifth and Sixth Years

Congratulations, you passed phase I. But what about phase II? Phase II includes many core modules and also System-Based Modules. The aim of this phase is to lay down a solid foundation for the subsequent full-time clinical study in stage III of the MBBS program. It will also integrate the basic sciences knowledge with the clinical sciences. This include knowledge, skill and attitudes, particularly attitudes towards the learning process. The curriculum philosophy in stage II is enforcing the development of a mixture of teaching approaches including System-Based Learning, Problem-Based Learning and also stressing on the idea of "Student Self-Directed Learning".

The department has the honor to introduce this study guide to you hoping that it may be helpful in making you oriented with the aims, objectives, contents of our courses, and through it, you will find the answers of the frequently asked questions.

All the Best

Department Chairman

TABLE OF CONTENTS

Topic		Page
THE OUTCOMES OF THE UNDERGRADUATE CURRICULUM		1
CURRICULUM MAP		2
PHASE 2		3
STRUCTURE OF THE MODULE		3
INTRODUCTION		4
AIMS & OBJECTIVES		4
TEACHERS CONTACTS		6
ASSESSMENT		7
ICONS		8
TOPIC OUTLINES		9
Lectures		
Lecture	Title of the lecture	
1	Front and medial sides of the thigh and femoral triangle (1/2).	11
2	Front and medial sides of the thigh and femoral triangle (2/2).	13
3	Gluteal region.	15
4	Back of thigh and popliteal fossa.	17
5	Anterior compartment of the Leg and dorsum of the foot.	19
6	Lateral and Posterior Compartments of the Leg.	21
7	The foot and venous and lymphatic drainage of the lower limb.	23
8	Dermatomes and nerve injury of the lower limb.	25
9	Pectoral region and breast.	27
10	Axilla (1/2): Boundaries and axillary vessels.	29
11	Axilla (2/2): Brachial plexus, axillary lymph nodes and lymphatic drainage of the upper limb.	31
12	Back and scapular region.	33
13	Arm, cubital fossa and superficial veins of the upper limb.	35

14	Anterior Compartment of the Forearm.	37
15	Lateral and Posterior Compartments of the Forearm.	39
16	Hand.	41
17	Dermatomes and nerve injuries of the upper limb (1/2).	43
18	Nerve injuries of the upper limb (2/2).	45
19	Intercostal spaces and pleura.	47
20	Lungs and bronchopulmonary segments.	49
21	Major Blood vessels of the Thorax.	51
22	Blood Supply of the Heart.	53
23	Superior mediastinum.	55
24	Posterior mediastinum.	57
25	Nerves, vessels and lymphatic drainage of the thorax.	59
26	Blood, lymph and nerve supply of the abdomen.	61
27	Anal and urogenital triangles.	63
28	Pelvic peritoneum, fasciae and muscles.	65
29	Pelvic nerves and vessels.	67
30	Male and female pelvic viscera.	69
Practical		
Practical	Title of the Practical Session	
1	Hip bone, femur and patella and femoral triangle.	71
2	Front and medial sides of the thigh.	72
3	Gluteal region.	73
4	Back of the thigh, and popliteal fossa.	74
5	Hip joint, tibia, fibula and skeleton of the foot.	75
6	Anterior and lateral compartments of the leg and dorsum of the foot.	76
7	Posterior compartment of the leg and sole of the foot.	77
8	- Joints of the lower limb. - Surface and radiological anatomy of the lower limb.	78
9	Scapula, clavicle, humerus, sternum, 1 st and typical rib.	79
10	Pectoral region, breast and Axilla (1/2)	80
11	Axilla (2/2), sternoclavicular and acromioclavicular joints.	81

12	Back and scapular region.	82
13	- Radius, ulna and skeleton of the hand. - Superficial veins and cutaneous nerves of the upper limb.	83
14	Shoulder joint, arm and cubital fossa.	84
15	Anterior compartment of the forearm.	85
16	Posterior compartment of the forearm and dorsum of the hand.	86
17	Palm.	87
18	- Joints of the upper limb. - Surface and radiological anatomy of the upper limb.	88
19	- Thoracic cage. - Thoracic wall and pleura.	89
20	Lungs.	90
21	Major Blood vessels of the Thorax.	91
22	Blood Supply of the Heart.	92
23	Posterior mediastinum.	93
24	Surface Anatomy of the thorax.	94
25	Radiological anatomy of the thorax.	95
26	Anterior Abdominal Wall	96
27	Peritoneum and Visceral Arrangement	97
28	Gastrointestinal Tract	98
29	Kidney, Ureters, Suprarenal Gland.	99
30	Vessels of the Abdomen	100
31	Nerves of the Abdomen	101
32	Surface anatomy of the abdomen.	102
33	Radiological anatomy of the abdomen.	103
34	Perineum.	104
35	Muscles of the pelvis.	105
36	Nerves and vessels of the pelvis.	106
37	Male and female bony pelvis.	107
38	Male pelvic viscera.	108
39	Female pelvic viscera.	109
40	Radiological Anatomy of the Pelvis	110
